Deadline for manuscript submissions: **20 February 2024**

Message from the Guest Editors

Dear Colleagues,

Differential geometry is the study of the geometric properties of differential manifolds and submanifolds. This Special Issue aims to provide the latest results in modern topics of the differential geometry of submanifolds, especially with respect to the new developments and advances in this field. Potential topics include but are not limited to:

- (Pseudo) Riemannian geometry of submanifolds;
- Riemannian invariants;
- δ-invariants;
- Lagrangian submanifolds;
- CR and slant submanifolds;
- Affine hypersurfaces.
